

# VNCcalendar

Calendar software to help you plan and  
organize your schedule

# VNC – Virtual Network Consult AG

VNC is the leading vendor of an integrated stack of collaboration and communication products for organisations who prefer to go with software that is based on open standards: VNClagoon.

## About us

VNC – Virtual Network Consult AG, based in Switzerland, Germany and India – is a leading developer of open source based enterprise applications and positions itself as an open and secure alternative to the established software giants.

With the VNClagoon software stack, VNC, with its global open source developer community, have created an integrated product suite for Enterprise, SME, Governments and other Organisations, characterised by high security, state-of-the-art technology and low TCO.

The VNClagoon software stack consists of a variety of integrated products for seamless communication and collaboration, such as messaging, video conferencing, email, groupware, task & project management, file sharing, channels, and more. VNClagoon is a leading alternative to closed source and / or SaaS-only applications like Microsoft Teams, Zoom, WhatsApp and others.

The impressive list of VNC customers, who are using one or several of the VNClagoon components and products, demonstrates the solidity of the VNC concept: the future of modern software will no longer rely on closed source!

# VNCcalendar

Calendar software to help you plan and organize your schedule

In business environments, every activity is related to a date and time.

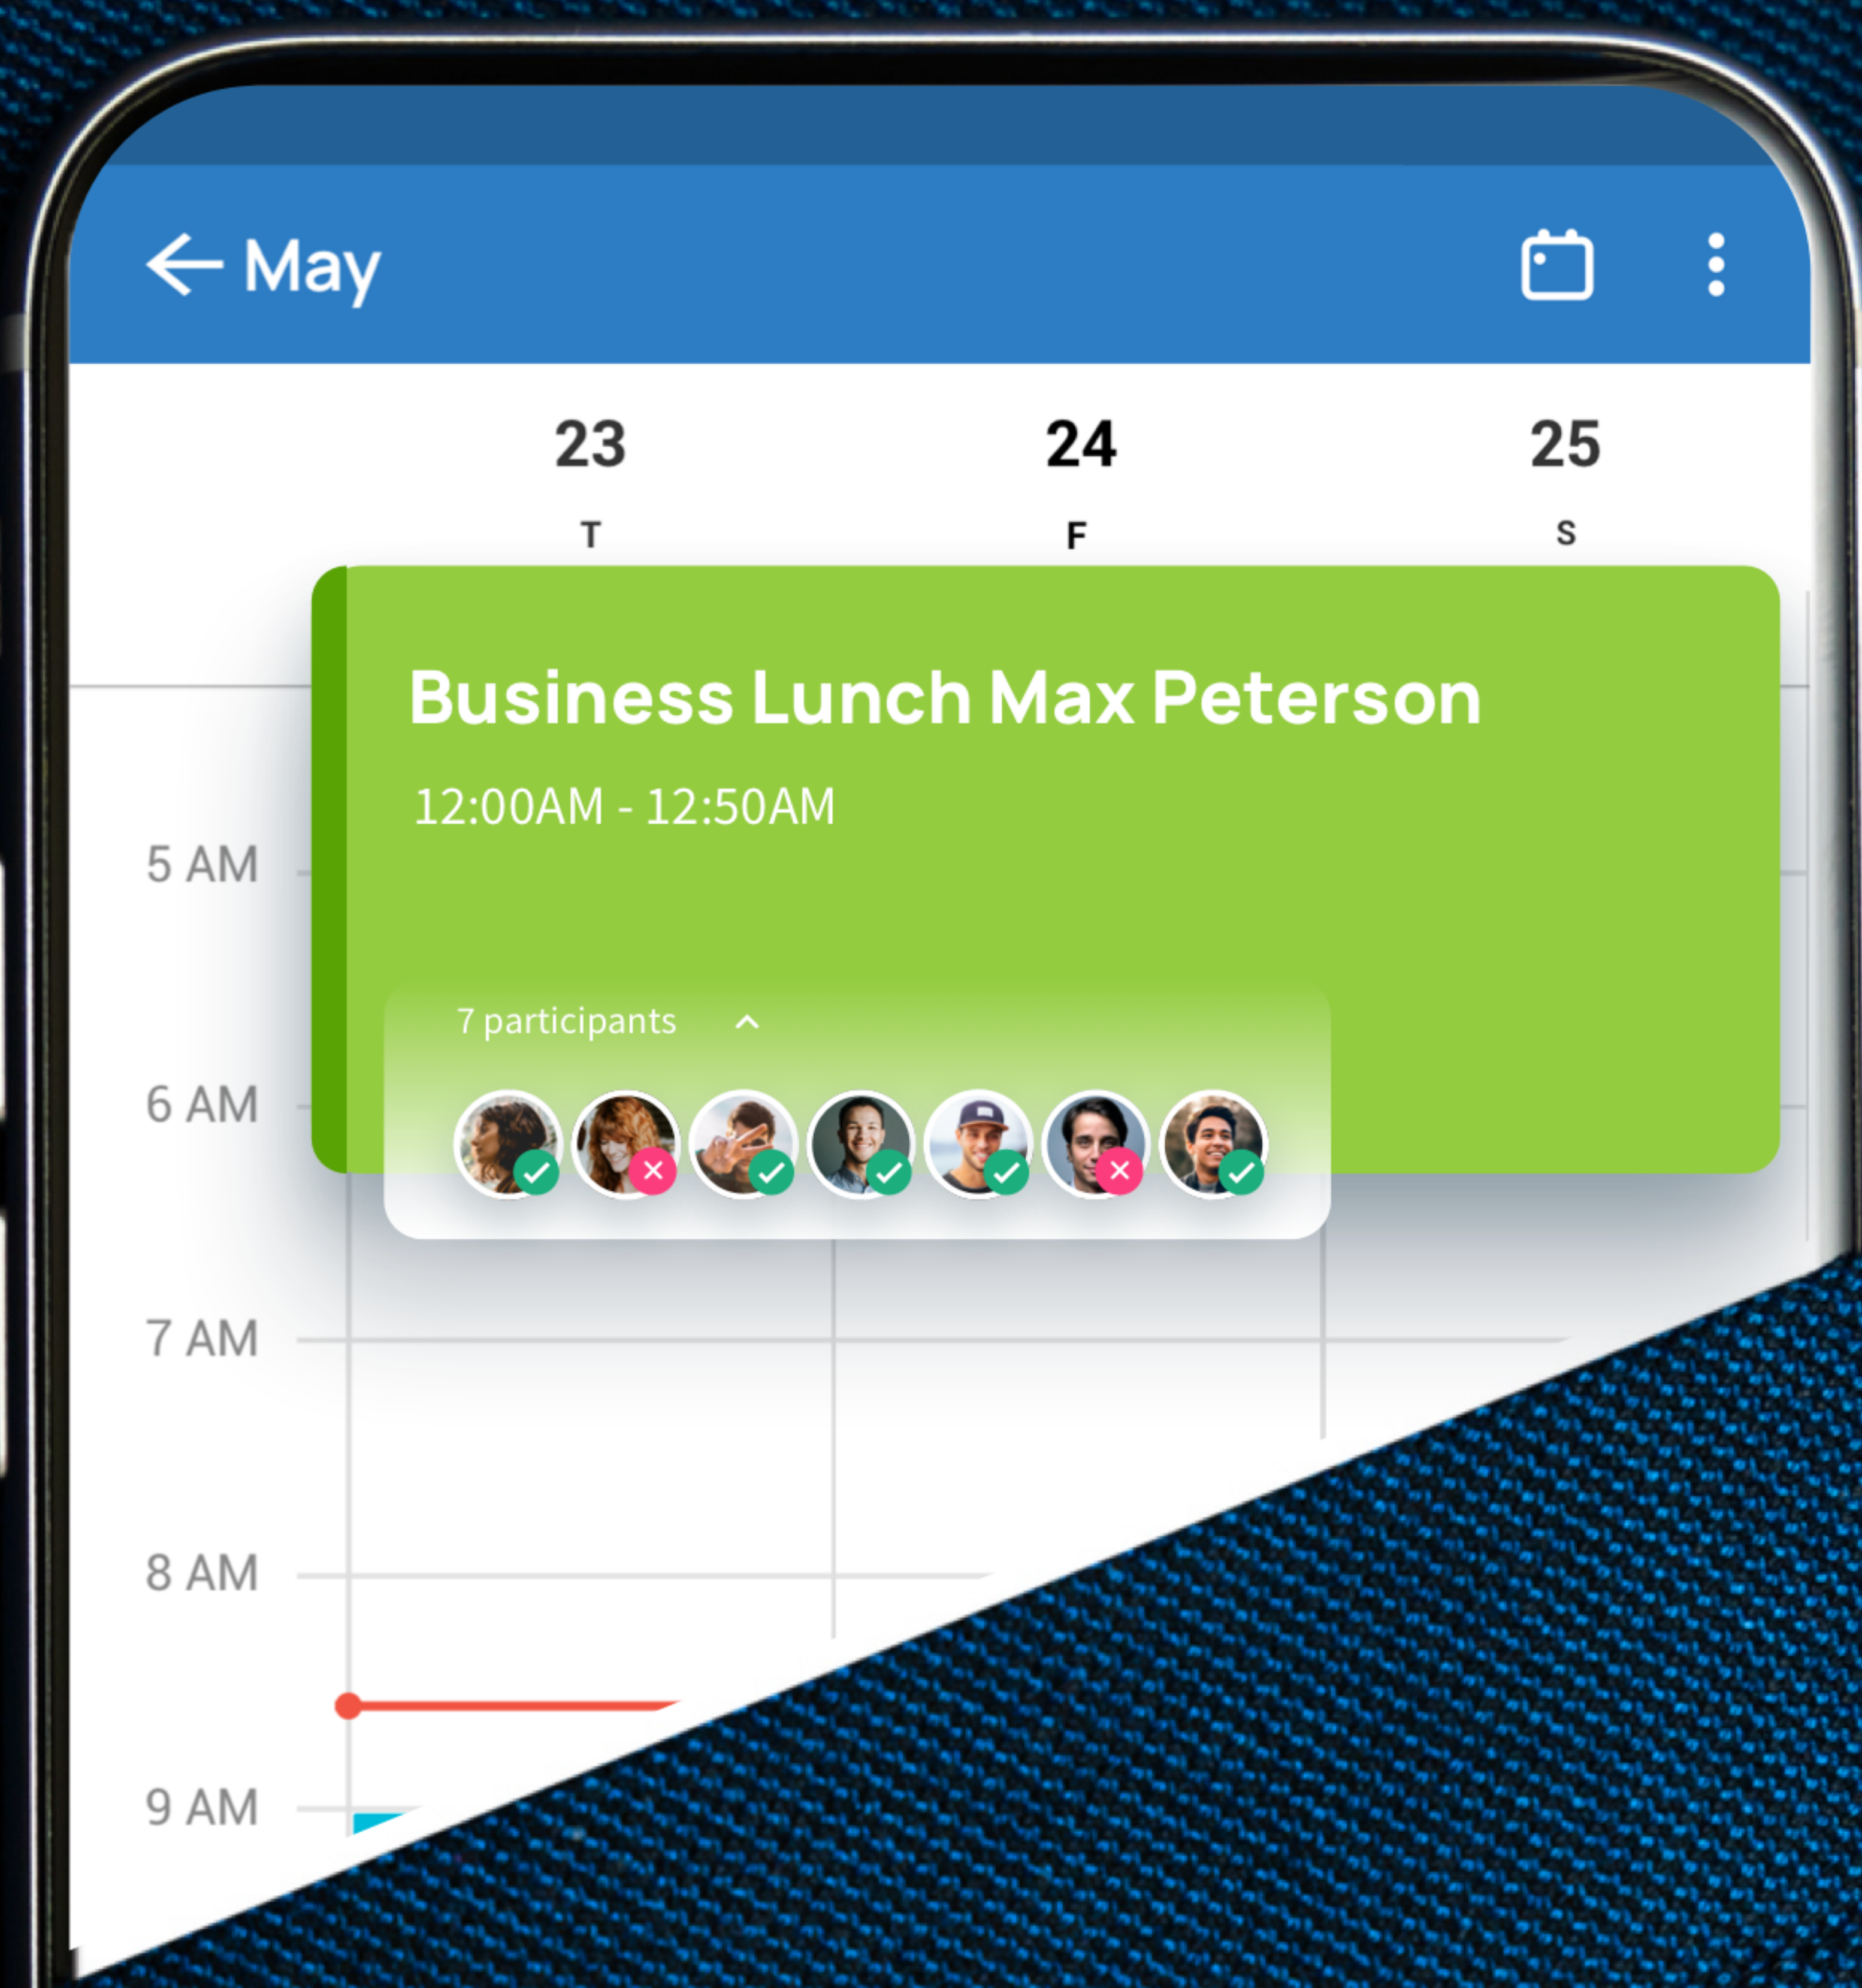

Successful business often means “fast moving”. In order to be successful, teams need to be perfectly organized. A key element to be organized is a powerful insight into milestones, deadlines and upcoming events, whatever they may be.

To get an accurate, immediate and complete overview, you need a “power calendar” that is always updated, containing all events that may be relevant.

A calendar is supposed to show all relevant actions scheduled on a certain date or within a period at one glance .

VNCcalendar is based upon state of the art frontend technologies, presenting your events on any device, including mobile Apps. VNCcalendar receives its datafeed (your dates and meetings) via the powerful VNCaxf Restful API.

As a consequence, VNCcalendar is fed from various backend information systems such as VNCmail, VNCproject, VNCtalk and others – integrated as needed.

# Get organized!

VNCcalendar provides every useful feature you are familiar with, such as different settings for the calendar view (day, work week, week, month), creating and displaying several calendars and sub-calendars in different colors, sharing your calendar with other users (entries are visible or private).

All VNCcalendar features are implemented in a tidy and convenient design and can be used intuitively.

## All Sources in One App

Connect VNCcalendar with all your applications: VNCproject, VNCmail and many more.

## Full-featured Appointments

Topic, location, attendees, date and time, description, ressources , attachments, etc.

## VNClagoon Integrations

Add appointments from emails, tickets, tasks, scheduled calls and other VNClagoon features.

## Must have Features

VNCcalendar provides every useful feature you are familiar with and required for your work.

## Notifications & Reminders

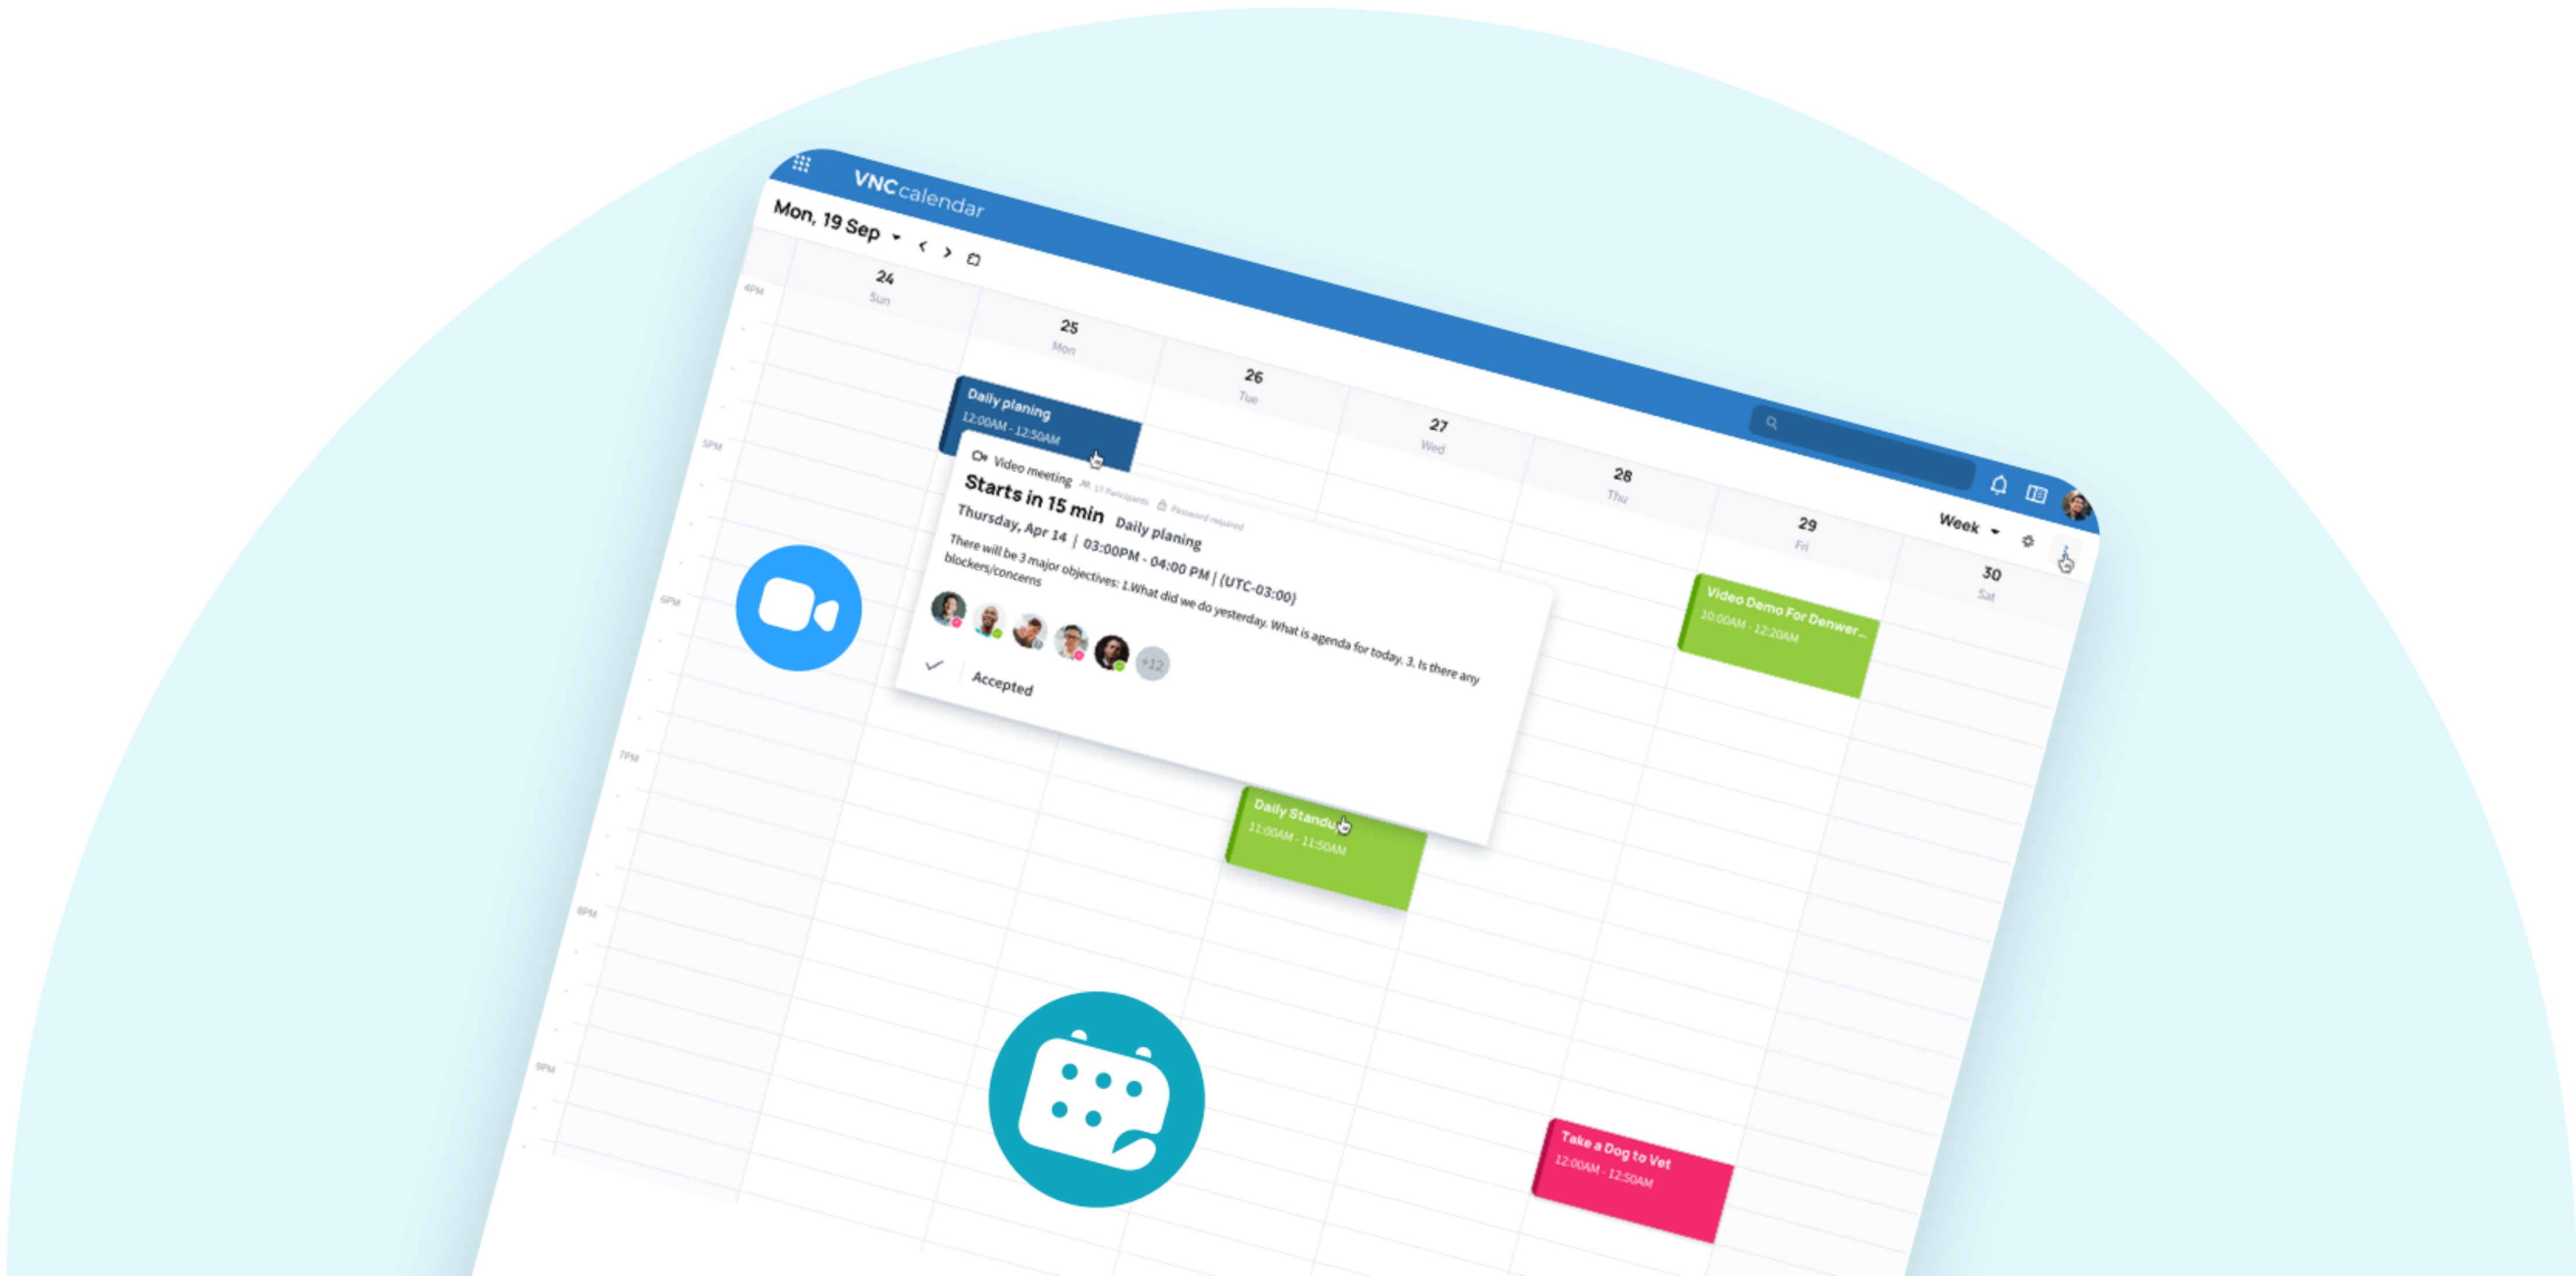

VNCcalendar will remind you with notifications. You can define your personal notification patterns.

## Multiple Calendars

Create, display and share several calendars and sub-calendars in different colors.

VNCcalendar is the only calendar application you need for all work-related appointments, team schedules, recurring events or whatever else you wish to do. It efficiently helps you to plan and organize your week ahead.

“VNC challenges the software giants that are oppressing the market with their expensive, inflexible and uninventive proprietary solutions. It’s time for open-source applications to finally replace them. We use VNC’s collaboration tools ourselves, including VNCtalk and, most recently, VNCchannels. The tools have made the transition to working from home extremely easy. The comprehensive VNClagoon product suite is a real highlight in terms of functionality and operation.”

Alain Blaes, Managing Director of PR-COM Beratungsgesellschaft für strategische Kommunikation mbH

**PRCOM**

“The federal state church intranet should strengthen communication and cooperation within the state church. The basic aim is to provide all full-time employees and volunteers of the regional church with access to an innovative, modern and unified communication and collaboration infrastructure. The VNClagoon products are particularly well suited for this, because they allow us as a state church – in addition to the many functionalities provided – the possibility of customization options to individual needs within our church. “

Tabea Langguth, Project Manager  
Landeskirchenweites Intranet, EKBO

**EVANGELISCHE KIRCHE**  
Berlin-Brandenburg-schlesische Oberlausitz

“VNC and DFB GmbH have been working together intensively for many years. We want to continue and expand this. The DFBnet mailbox developed and implemented by VNC has enormously accelerated and simplified our internal communication. With this, we see ourselves well prepared for future requirements.”

Steffen Iredi, authorized signatory at  
DFB GmbH and responsible Director  
Technology & Operations

“My team and I are very thankful for being able to count on the professional and sophisticated VNC team. VNC has supported us with a series of important projects, always exceeding our high expectations.”

Marius Hjelset, Project Head Hosted  
Services, Vodafone Group

**vodafone**

# Thank you for your Interest!
