# VNCdirectory

Full-blown directory tools for all VNClagoon applications

# VNC – Virtual Network Consult AG

VNC is the leading vendor of an integrated stack of collaboration and communication products for organisations who prefer to go with software that is based on open standards: VNClagoon.

## About us

VNC – Virtual Network Consult AG, based in Switzerland, Germany and India – is a leading developer of open source based enterprise applications and positions itself as an open and secure alternative to the established software giants.

With the VNClagoon software stack, VNC, with its global open source developer community, have created an integrated product suite for Enterprise, SME, Governments and other Organisations, characterised by high security, state-of-the-art technology and low TCO.

The VNClagoon software stack consists of a variety of integrated products for seamless communication and collaboration, such as messaging, video conferencing, email, groupware, task & project management, file sharing, channels, and more. VNClagoon is a leading alternative to closed source and / or SaaS-only applications like Microsoft Teams, Zoom, WhatsApp and others.

The impressive list of VNC customers, who are using one or several of the VNClagoon components and products, demonstrates the solidity of the VNC concept: the future of modern software will no longer rely on closed source!

# VNCdirectory

Full-blown directory tools for all VNClagoon applications

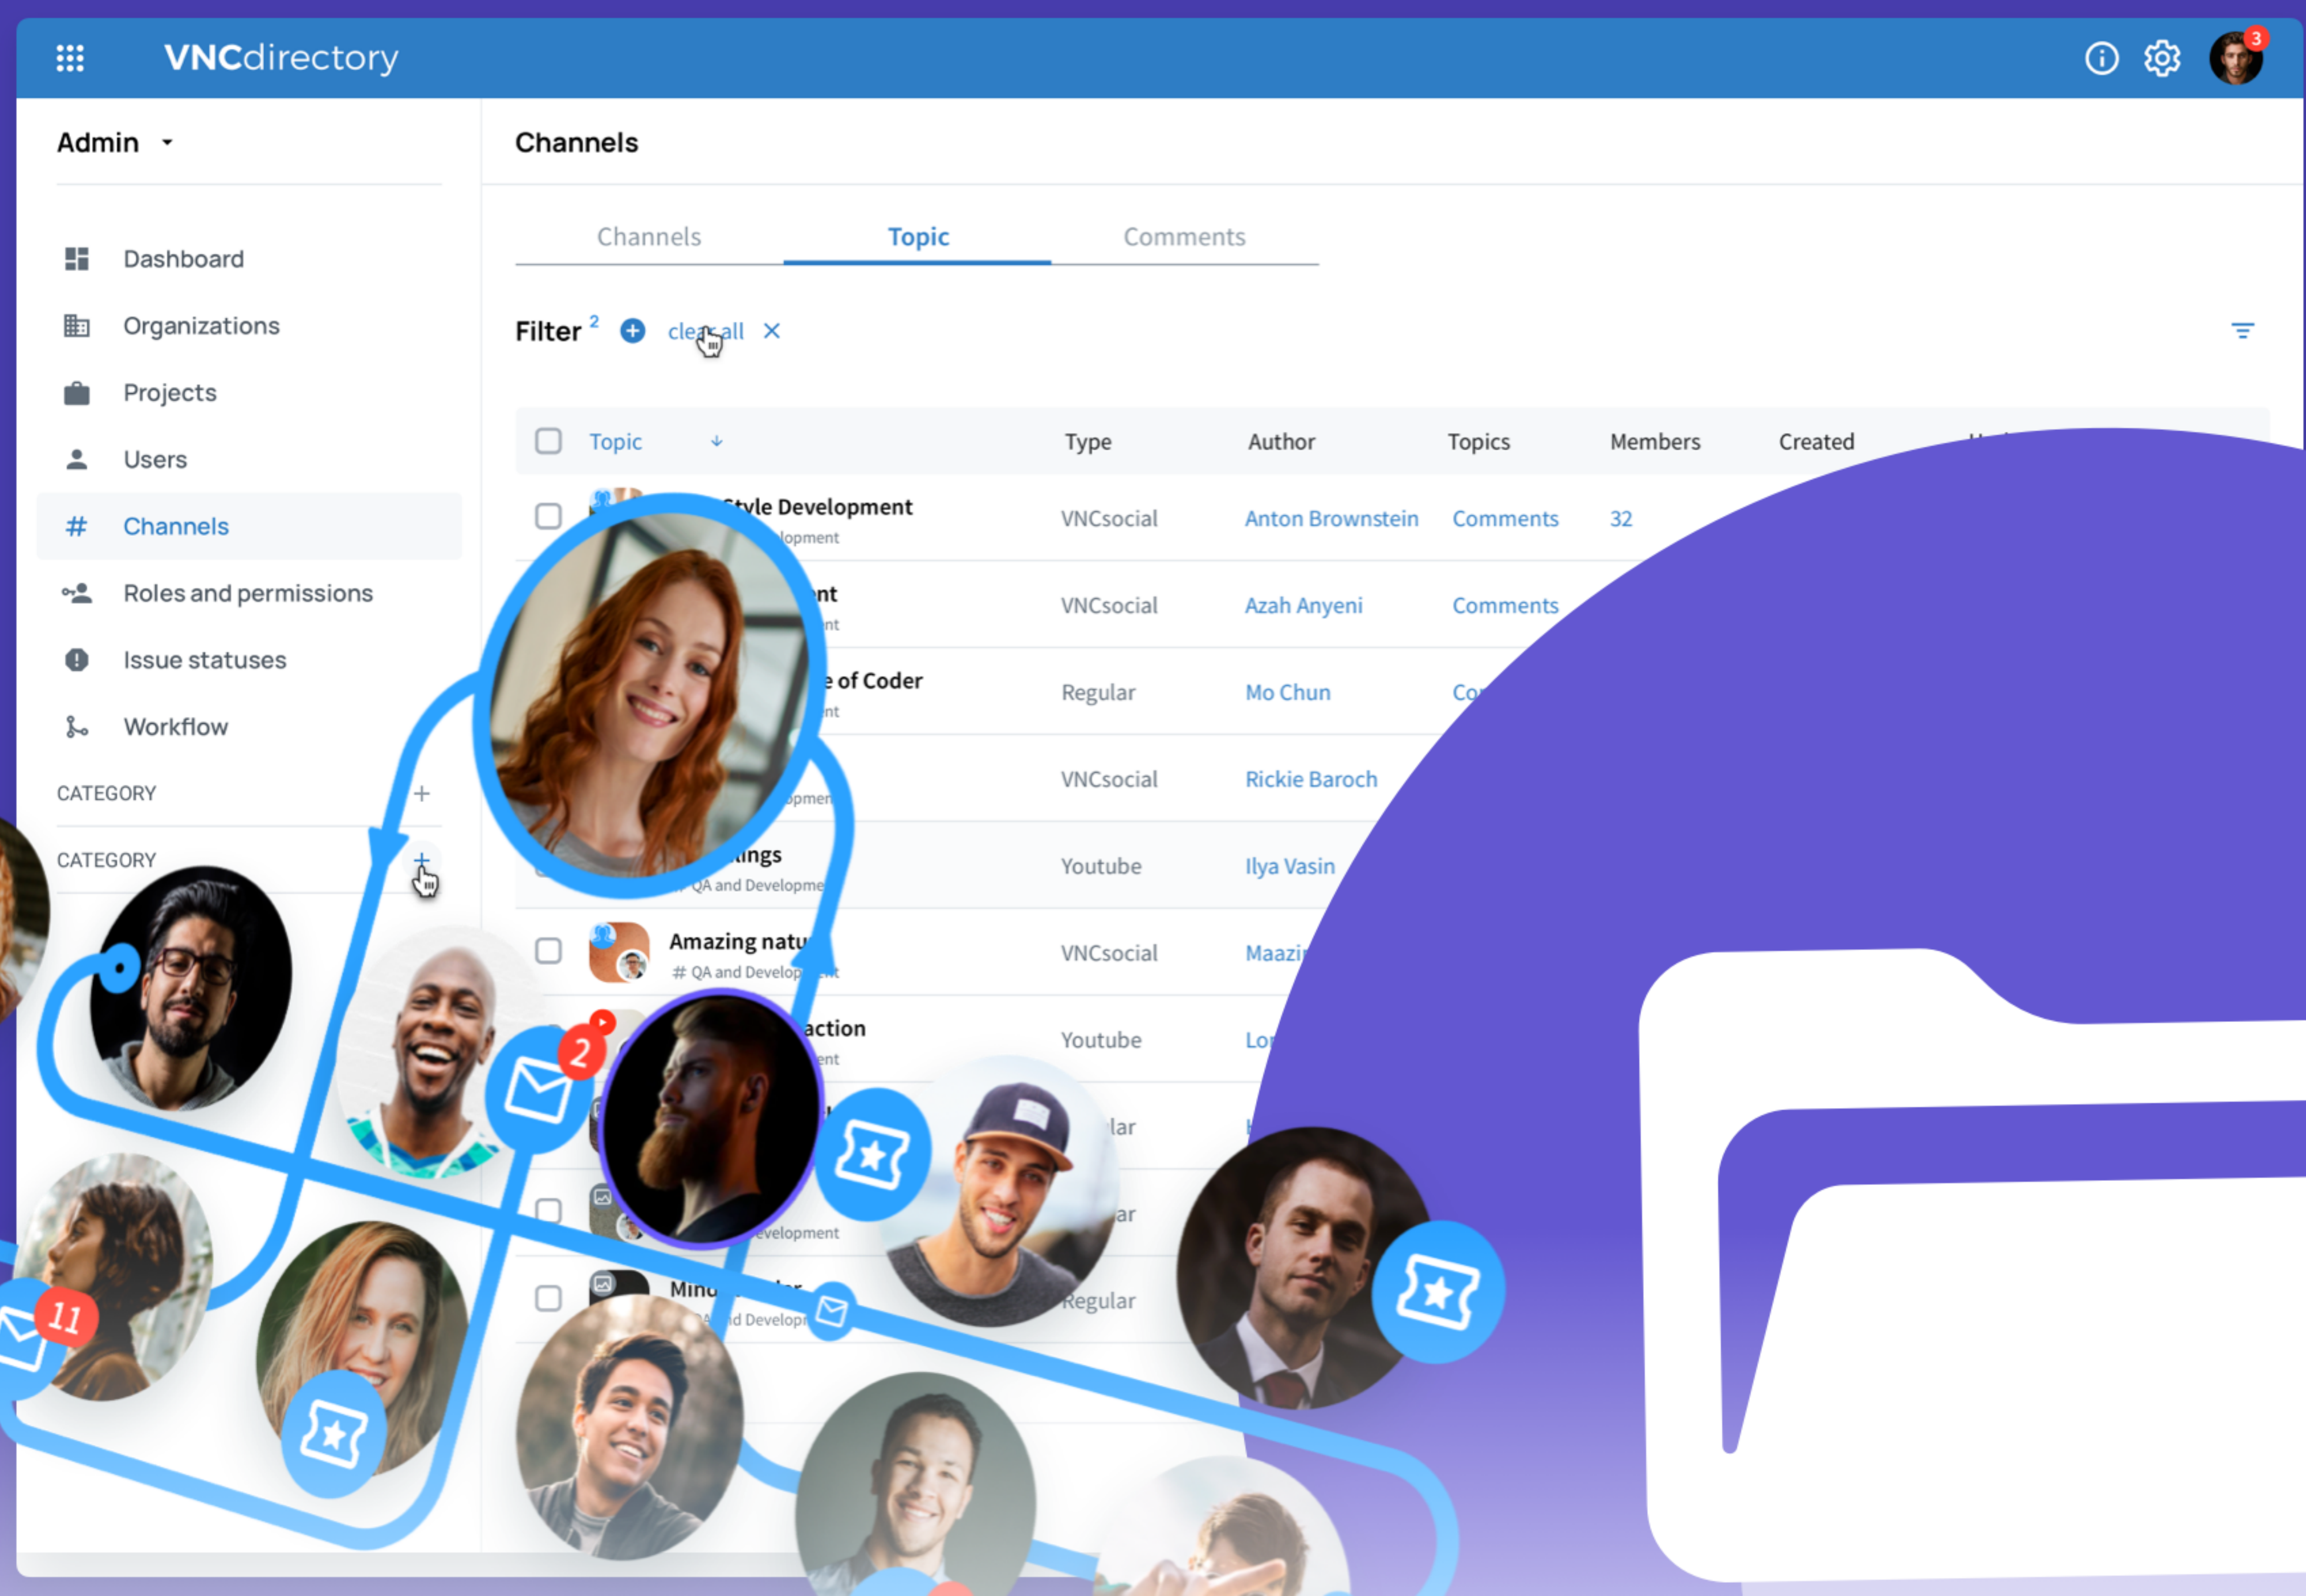

VNCdirectory is the professional directory service for VNClagoon.

VNCdirectory enables the full VNC software stack to be used with Single-Sign-On (SSO) and one set of credentials. With VNCdirectory, the creation and management of new users boils down to a few clicks in one centralized admin-interface in contrast to adding the user in each application. It provides user provisioning procedures for all VNClagoon products, also integrated with external directories.

Users can be managed in organisations, departments and teams with granular roles and permissions.

The VNClagoon Start Page, from where you can navigate to the VNClagoon products you are subscribed to, is also managed within VNCdirectory.

Optionally, VNCdirectory includes an ITIL-based Helpdesk module, with which you can manage your VNClagoon support tickets professionally.

## The professional directory service for VNClagoon

- Single-Sign-On to all VNClagoon products
- Single-Log-Out
- 2-Factor Authentication
- integration with directory services
- user management
- exchange authentication data between VNClagoon products
- user provisioning
- syncing clients
- syncing passwords
- directory schemas

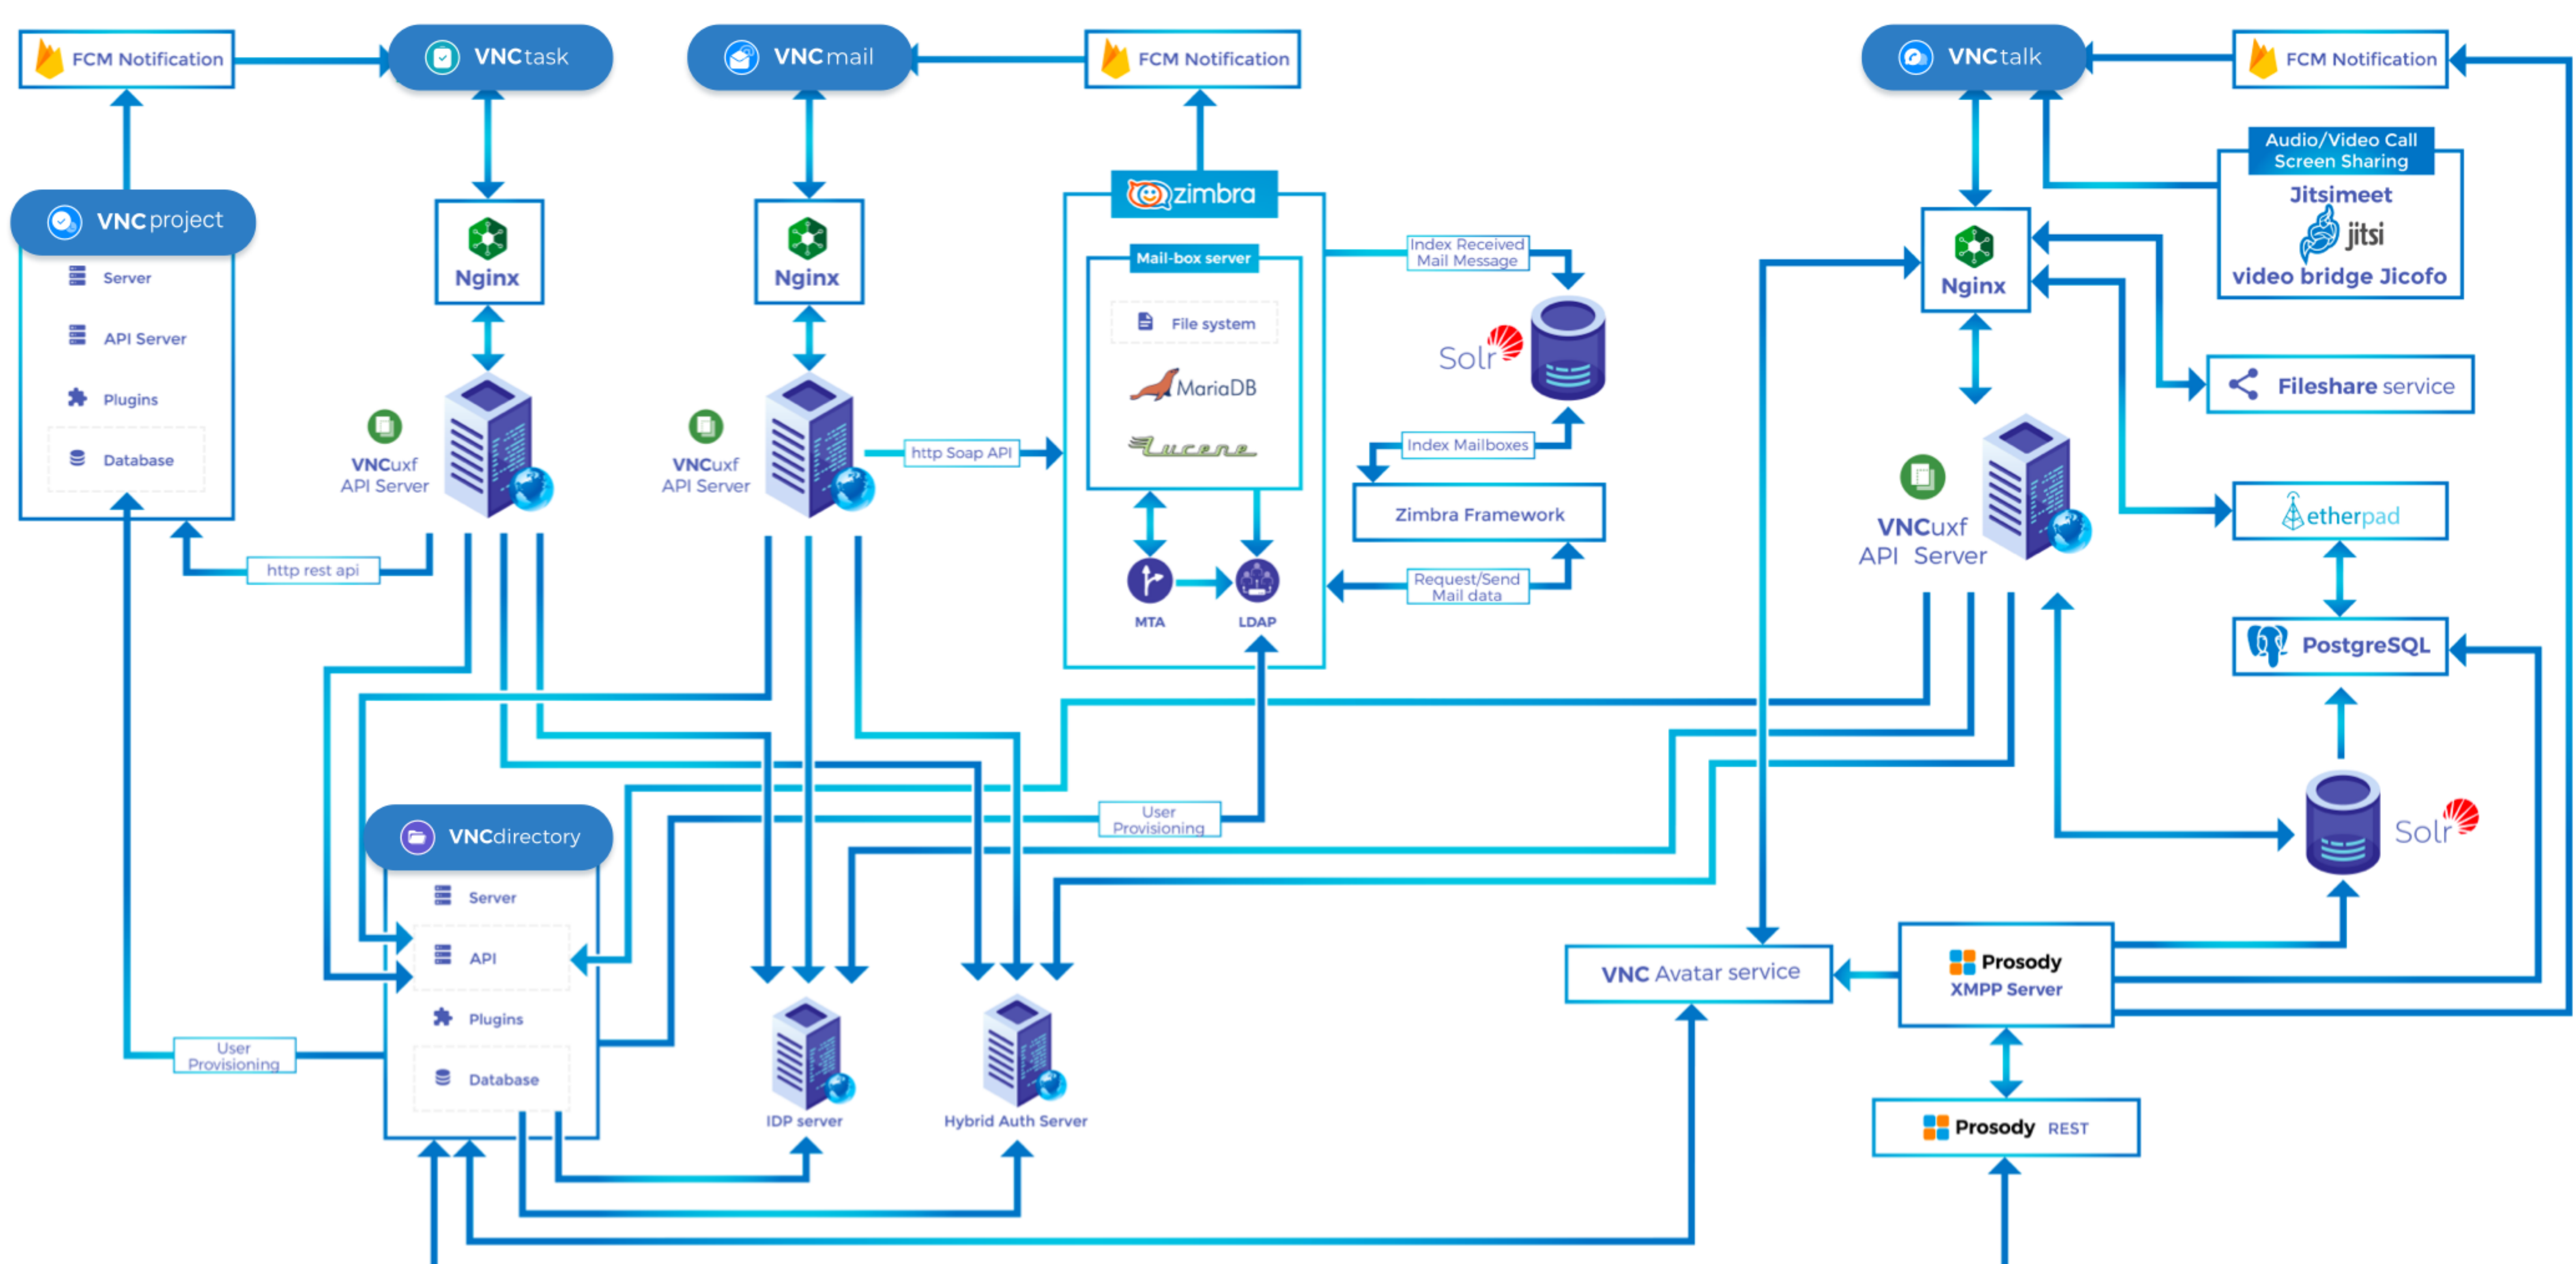

### Secure Account Management

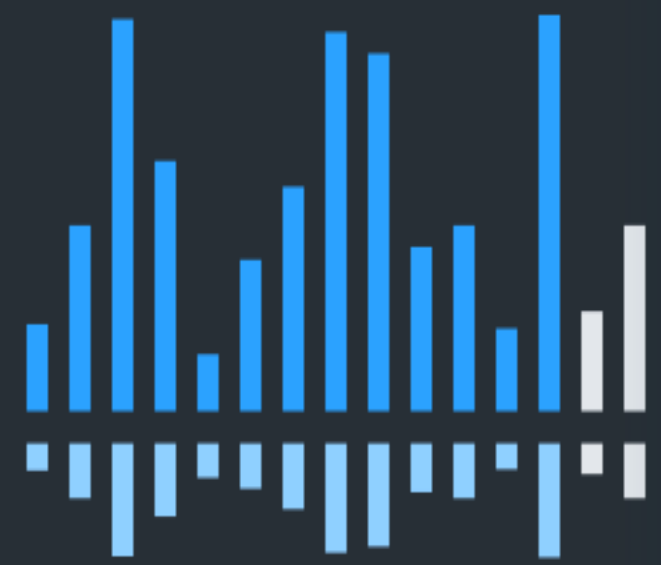

All VNClagoon accounts are managed within one secure backend.

## VNCdirectory Architecture

This Architecture Chart provides a comprehensive overview of the architecture of the VNCdirectory software system, the integrated products and components, databases, servers, interfaces and services.

# VNCtalk keeps you connected

**In the era of remote work, it's business as usual with VNCIagoon**

VNCIagoon Products are purpose-built for secure interactions of all kinds.

VNC's holistic approach to communication and collaboration uses only the most reliable open source technology to deliver a highly secure and flexible business process-centric solution to your organization. It's the most adopted open source, secure alternative to the established software giants with lower upfront license fees and less ongoing costs.

“VNC challenges the software giants that are oppressing the market with their expensive, inflexible and uninventive proprietary solutions. It’s time for open-source applications to finally replace them. We use VNC’s collaboration tools ourselves, including VNCtalk and, most recently, VNCchannels. The tools have made the transition to working from home extremely easy. The comprehensive VNClagoon product suite is a real highlight in terms of functionality and operation.”

Alain Blaes, Managing Director of PR-COM Beratungsgesellschaft für strategische Kommunikation mbH

**PRCOM**

“The federal state church intranet should strengthen communication and cooperation within the state church. The basic aim is to provide all full-time employees and volunteers of the regional church with access to an innovative, modern and unified communication and collaboration infrastructure. The VNClagoon products are particularly well suited for this, because they allow us as a state church – in addition to the many functionalities provided – the possibility of customization options to individual needs within our church. “

Tabea Langguth, Project Manager  
Landeskirchenweites Intranet, EKBO

**EVANGELISCHE KIRCHE**  
Berlin-Brandenburg-schlesische Oberlausitz

“VNC and DFB GmbH have been working together intensively for many years. We want to continue and expand this. The DFBnet mailbox developed and implemented by VNC has enormously accelerated and simplified our internal communication. With this, we see ourselves well prepared for future requirements.”

Steffen Iredi, authorized signatory at  
DFB GmbH and responsible Director  
Technology & Operations

“My team and I are very thankful for being able to count on the professional and sophisticated VNC team. VNC has supported us with a series of important projects, always exceeding our high expectations.”

Marius Hjelset, Project Head Hosted  
Services, Vodafone Group

**vodafone**

# Thank you for your Interest!

VNC – Virtual Network Consult AG is a leading developer of open source-based enterprise applications and positions itself as an open and secure alternative to the established software giants.
