VNC – Virtual Network Consult AG

VNC is the leading vendor of an integrated stack of collaboration and communication products for organisations who prefer to go with software that is based on open standards: VNClagoon.

About us

VNC – Virtual Network Consult AG, based in Switzerland, Germany and India – is a leading developer of open source based enterprise applications and positions itself as an open and secure alternative to the established software giants.

With the VNClagoon software stack, VNC, with its global open source developer community, have created an integrated product suite for Enterprise, SME, Governments and other Organisations, characterised by high security, state-of-the-art technology and low TCO.

The VNClagoon software stack consists of a variety of integrated products for seamless communication and collaboration, such as messaging, video conferencing, email, groupware, task & project management, file sharing, channels, and more. VNClagoon is a leading alternative to closed source and / or SaaS-only applications like Microsoft Teams, Zoom, WhatsApp and others.

The impressive list of VNC customers, who are using one or several of the VNClagoon components and products, demonstrates the solidity of the VNC concept: the future of modern software will no longer rely on closed source!

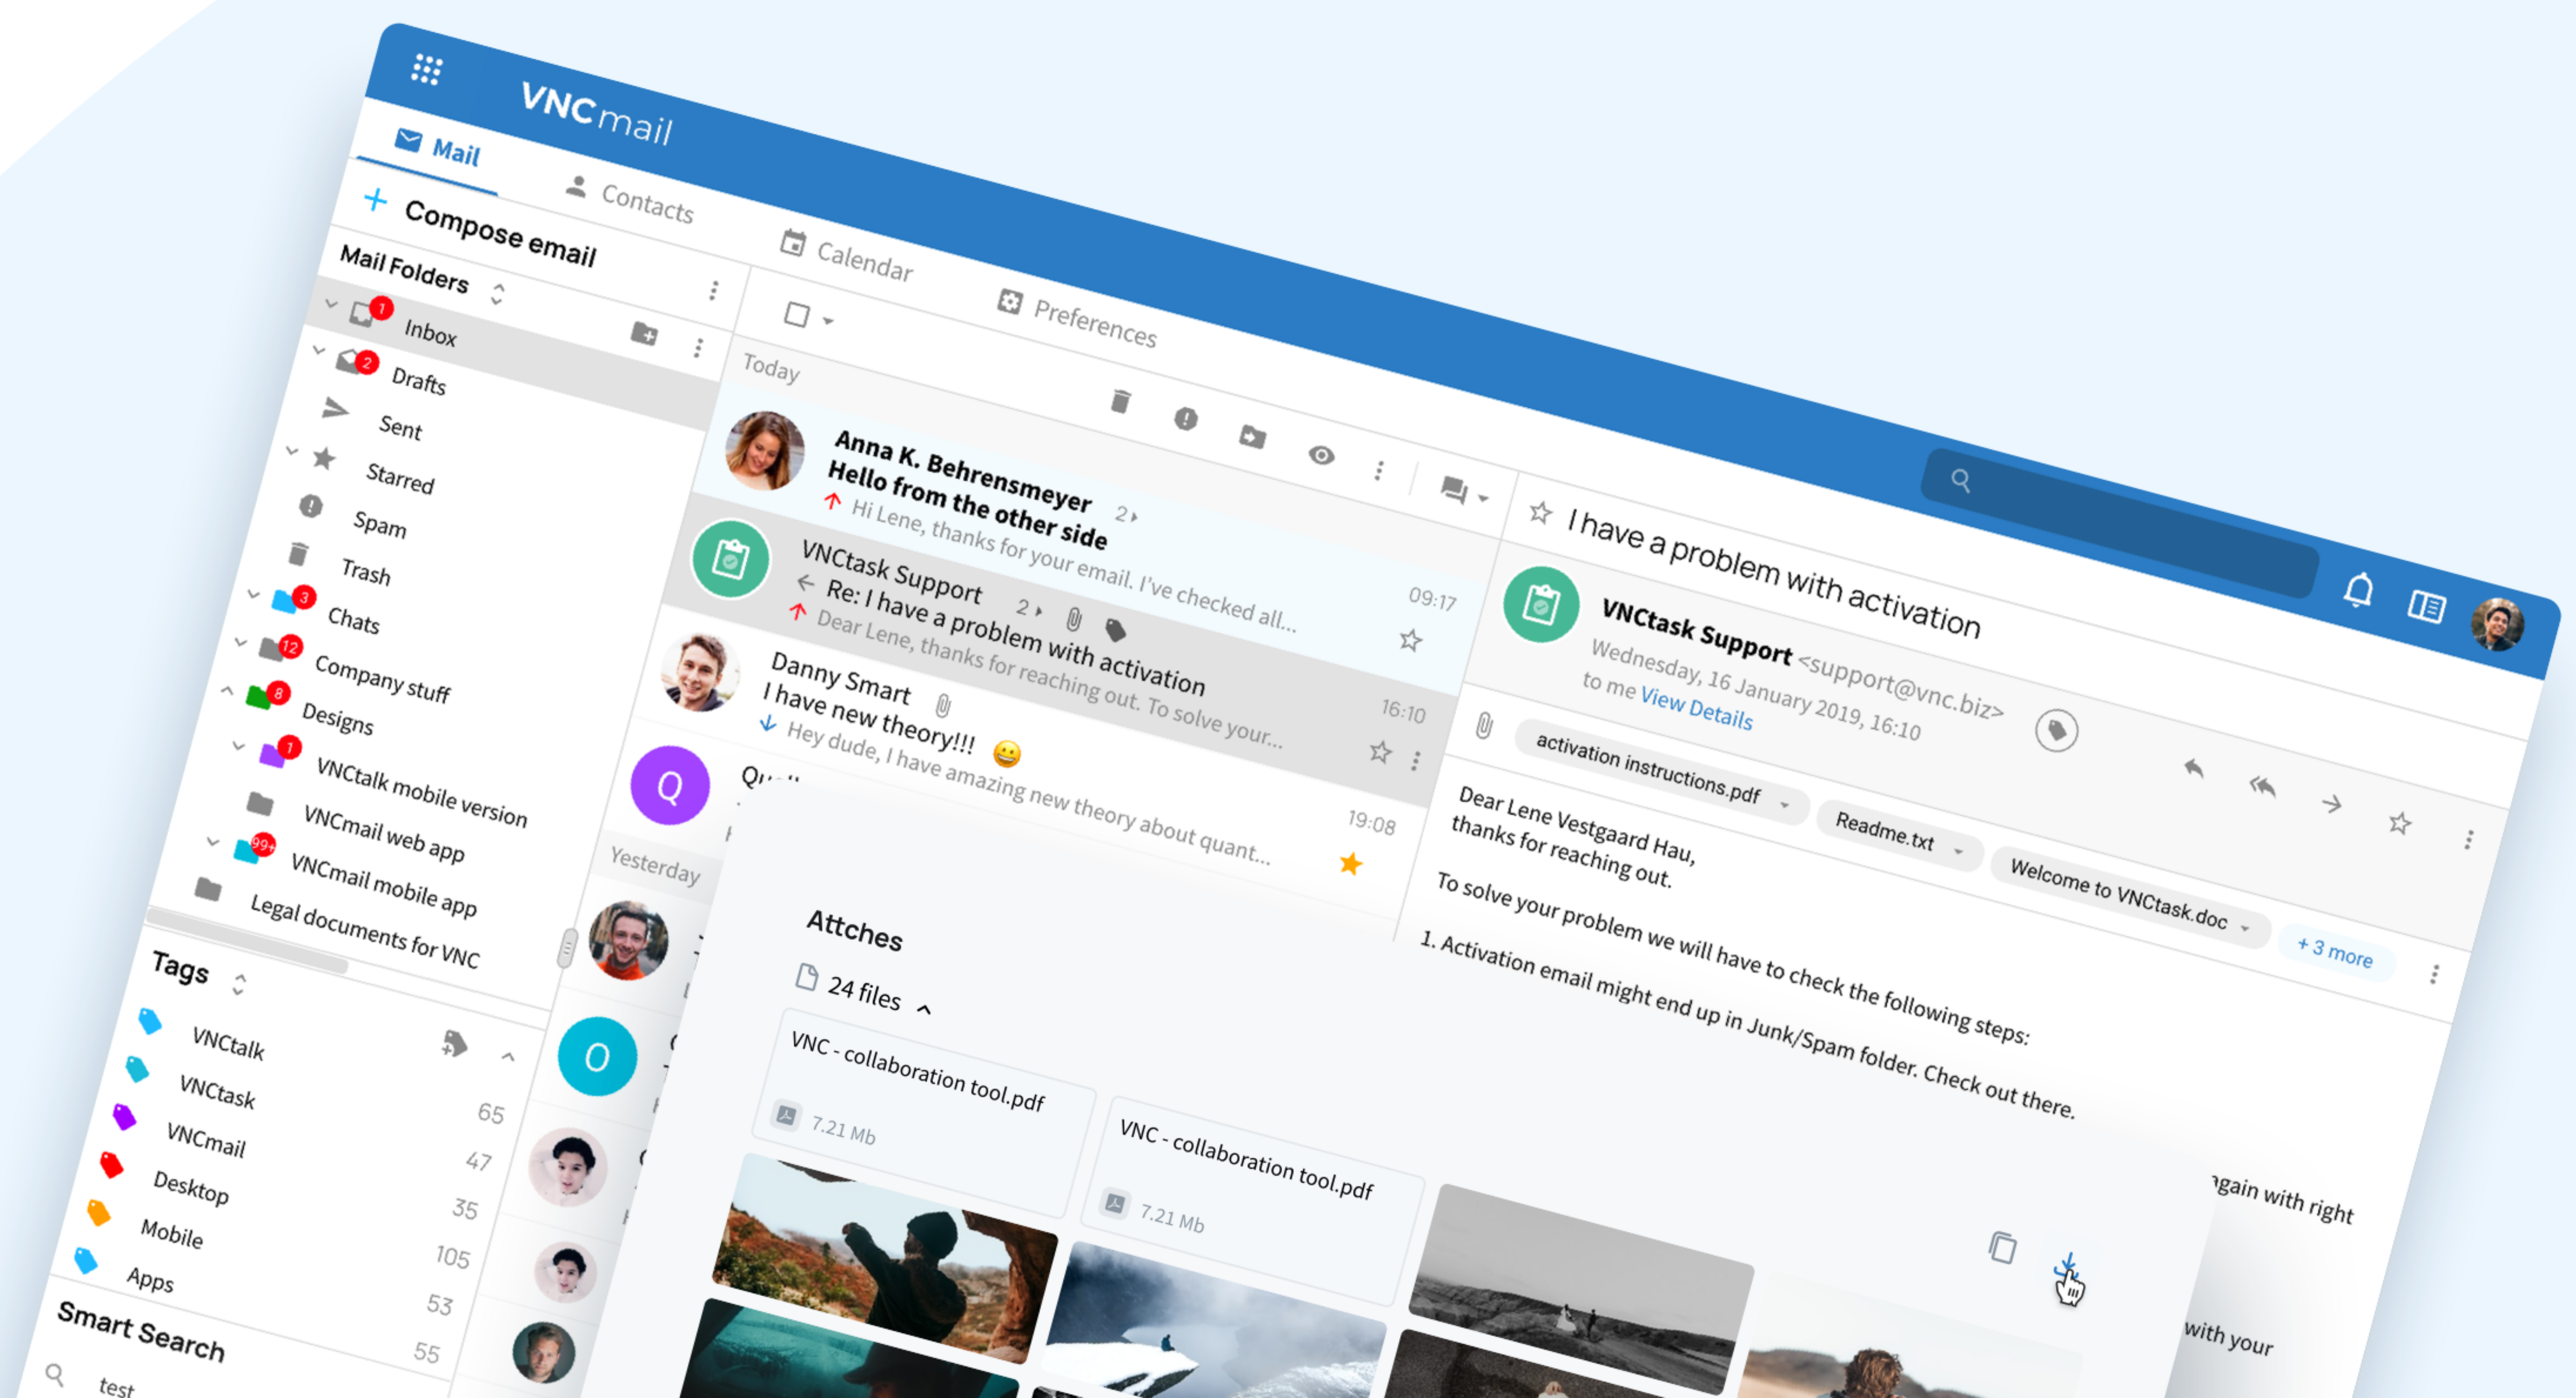

VNCmail

A whole new email experience
for enterprise communication

VNCmail offers all relevant mail features such as inbox, folders, filters, signatures, spam filters, keyboard shortcuts – in short, everything you are already familiar with from your everyday communication. And the clean VNCmail design makes communication fast and efficient.

VNCmail is more than just a common groupware tool. It can be integrated with several VNCproducts to vastly extend its range of functionalities. VNCsafe connects for example to VNCsafe, a file sync & share product, to attach files directly to emails. Of course any email attachment can be stored in VNCsafe, too.

VNCcontacts is integrated in VNCmail and offers powerful contact management functionalities where users not only can store any kind of contact with lots of information, but also can sort the contacts in predefined or individually created user lists.

Secure email for utmost privacy

VNCmail has integrated Blockchain technology to ensure the digital provenance of your emails by attaching a seal to each email in the form of a QR code that can be verified.

VNCmail is available as Web Client, Desktop Client and App so you in the loop wherever you are. The clear structure with folders and filters make navigation easy and transparent.

Through the fast syncing between all devices our users are always up to date.

Many solutions offer merely limited branding options. We enable our customers to strengthen their corporate identity with very granular design options, matching their needs. Instead of just pinning a company logo in the top left corner, we can adapt the complete user interface of VNCmail according to your company CD/CI and we can also customize functionalities to industries or user groups.

Notifications

VNCmail sends notifications to your browser, your desktop client or your smartphone – in case you want to be alerted.

Offline Mode

Read and write emails or edit drafts while you are offline, in all VNCmail clients. As soon as you are back online, VNCmail sends your scheduled emails and synchronizes the inbox.

Settings & Customization

VNCmail offers a wide variety of settings and customization options. Get access to your distribution lists and work groups thanks to the seamless integration with VNCdirectory.

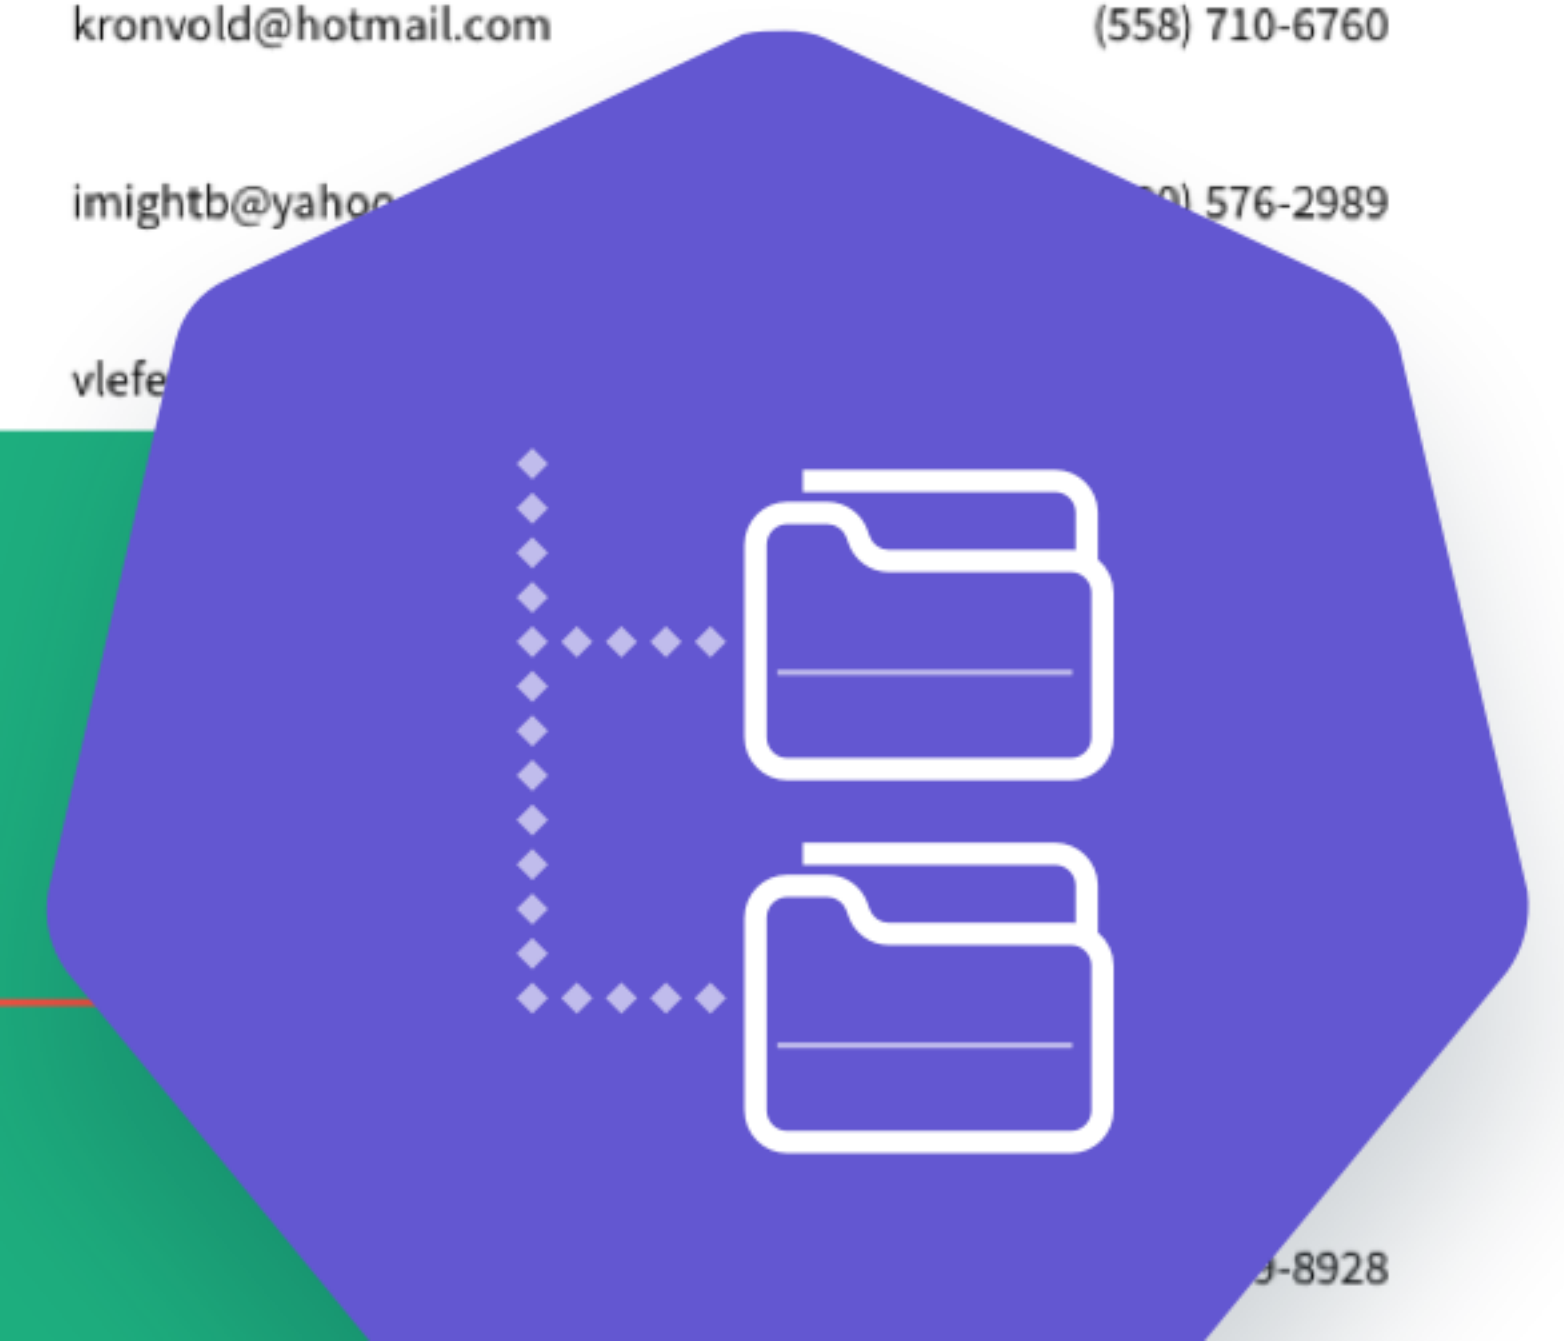

Integrated Groupware to manage your
emails, contacts, calendar and files

VNCcontacts is used for professional contacts and address management.

VNCcalendar is one calendar for all your appointments and is based upon state of the art frontend technologies, presenting your events on any device, including mobile Apps. Of course VNCcalendar will remind you with notifications. Here, you can set different notification patterns

The image displays two overlapping mobile application screens for VNCgroupware. The left screen, titled 'Profile', features a circular profile picture of a smiling woman and three action buttons at the bottom: 'Audio call' (phone icon), 'Video call' (video camera icon), and 'Chat' (speech bubble icon). The right screen, titled 'Contacts', has a blue header with the VNCgroupware logo and a sidebar menu on the left containing 'New contact', 'Contacts' (257), 'Frequently contacted' (20), 'Duplicates' (4), 'Trash' (1), 'Lists' (19) with sub-lists like 'Collagues' (65), 'Family' (47), 'Friends' (35), 'School' (105), and 'Aquintants' (53), and 'Tags' (65) with sub-tags like 'VNCtalk' (65), 'VNCtask' (47), and 'VNCmail' (35). The main area of the 'Contacts' screen shows 'Starred contacts (6)' and 'Contacts (251)'. The 'Starred contacts' list includes: Adriana C. Ocampo Uria (pedwards@optonline.net, (546) 966-6387), Adam Forrest (world@yahoo.ca, (371) 806-0819), Blake Simmons (agapow@yahoo.com, (576) 516-2208), Caroline Herschel (rmcfarla@yahoo.ca, (265) 459-1880), Cecilia Payne-Gaposchkin (brbarret@aol.com, (723) 359-1910), and Chien-Shiung Wu (cameron@hotmail.com, (723) 700-8952). The 'Contacts' list shows 'ACME marketing (3)' with Dorothy Hodgkin, Edmond Halley (kronvold@hotmail.com, (558) 710-6760), and Edwin Powell Hubble (imightb@yahoo.com, (509) 576-2989). Elizabeth Blackburn is partially visible at the bottom.

Advanced Groupware Features on Enterprise Level

VNCmail

VNCmail offers all relevant mail features such as inbox, folders, filters, signatures, and more.

VNCcalendar

VNCcalendar presents your appointments on any device, including mobile Apps.

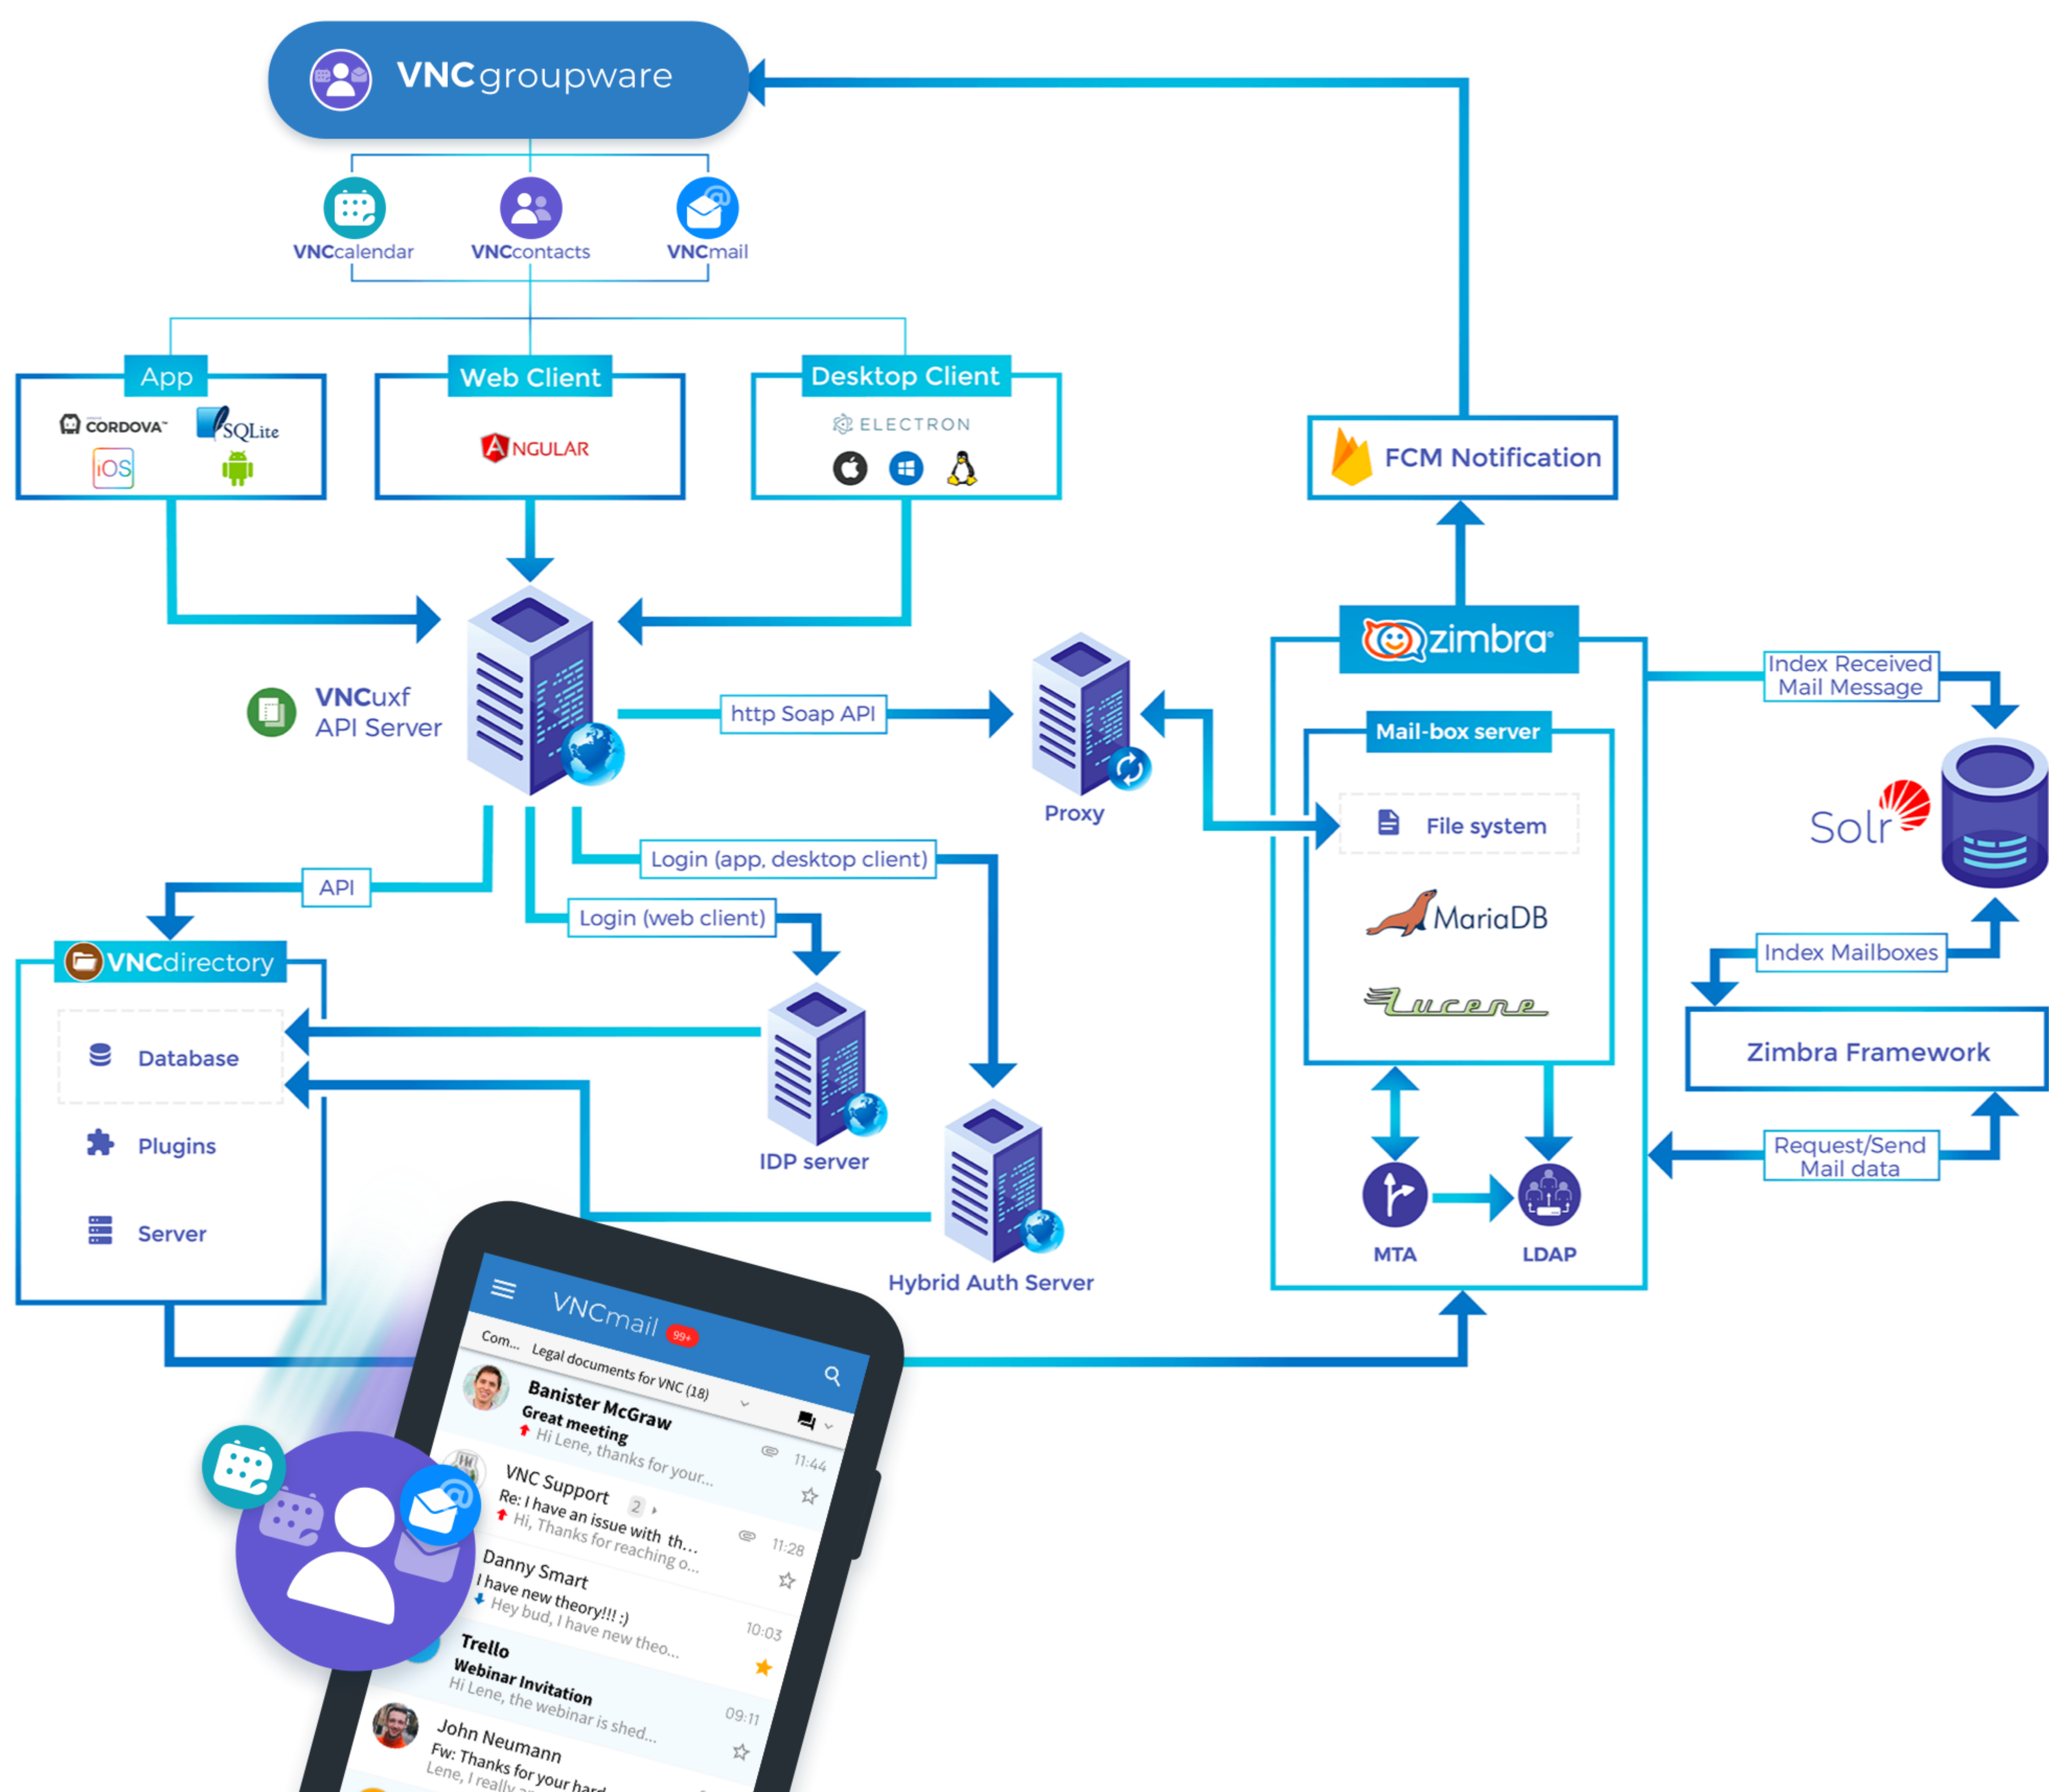

VNCcontacts

With its clear design VNCcontacts makes it really easy to manage as many contacts as you need.

VNCgroupware Architecture

This Architecture Chart provides a comprehensive overview of the architecture of the VNCgroupware software system, the integrated components, databases, interfaces and frontend clients.

“VNC challenges the software giants that are oppressing the market with their expensive, inflexible and uninventive proprietary solutions. It’s time for open-source applications to finally replace them. We use VNC’s collaboration tools ourselves, including VNCtalk and, most recently, VNCchannels. The tools have made the transition to working from home extremely easy. The comprehensive VNClagoon product suite is a real highlight in terms of functionality and operation.”

Alain Blaes, Managing Director of PR-COM Beratungsgesellschaft für strategische Kommunikation mbH

PRCOM

“The federal state church intranet should strengthen communication and cooperation within the state church. The basic aim is to provide all full-time employees and volunteers of the regional church with access to an innovative, modern and unified communication and collaboration infrastructure. The VNClagoon products are particularly well suited for this, because they allow us as a state church – in addition to the many functionalities provided – the possibility of customization options to individual needs within our church. “

Tabea Langguth, Project Manager
Landeskirchenweites Intranet, EKBO

EVANGELISCHE KIRCHE
Berlin-Brandenburg-schlesische Oberlausitz

“VNC and DFB GmbH have been working together intensively for many years. We want to continue and expand this. The DFBnet mailbox developed and implemented by VNC has enormously accelerated and simplified our internal communication. With this, we see ourselves well prepared for future requirements.”

Steffen Iredi, authorized signatory at
DFB GmbH and responsible Director
Technology & Operations

“My team and I are very thankful for being able to count on the professional and sophisticated VNC team. VNC has supported us with a series of important projects, always exceeding our high expectations.”

Marius Hjelset, Project Head Hosted
Services, Vodafone Group

vodafone
